Passionate about building with AI and deploying it against real business problems, turning internal processes into production tools that teams actually use.

PROFESSIONAL EXPERIENCE

Jun 26 - Present	HASSCORP Freelance Applied AI Engineer - Automating internal workflows for business teams across startups and VC funds, from process mapping to production deployment - Building white-label, market-ready software embedded in client companies and sold under their own brand	Paris
Jan 26 - Jul 26	NEWFUND French & US Venture Capital Fund VC Operating Analyst - Developed Eurheka, an AI tool aggregating and structuring multi-source scientific and patent data into actionable insights for deeptech due diligence (+10 regular users in 2 months) - Building the tech backbone of a new secondaries fund launch: a sourcing platform connecting LP-stake sellers to the fund, and an in-house CRM - Training C-level executives of portfolio startups on AI and shipping automations inside their operations	Paris
Jun 25 - Dec 25	SORARE Scale-up Operations Intern - Automated the annual player card creation process using Python & AppScript, saving the operations team 5+ working days during peak season - Supported the launch strategy of Sorare's new platform managing the allocation of match tickets from league and club partners - Built an internal AI-powered Slack agent (JavaScript) centralising company team data for instant access	Paris
Mar 24 - Aug 24	FONDATION PROSPECTIVE & INNOVATION Think Tank Project Manager - Organised the two largest annual forums (400+ attendees, including ministers and CEOs), enhancing the foundation's visibility and securing 9 new sponsors - Secured a new partnership with HEC Africa, bringing high-profile speakers to the foundation's events	Paris

PROJECTS

- English Learning Platform:** Built a full-stack AI-powered web app (JavaScript, frontend & backend) enabling users to enhance English writing and speaking through adaptive learning. Integrated OpenAI's API to deliver real-time feedback and personalized progress tracking
 - Tested by +5 early users with +80% retention / satisfaction rate
 - Designed product roadmap to scale toward a SaaS model targeting students and professionals
- Mybar:** Built a full-stack web app integrating course materials and adaptive multiple-choice quizzes across 3 law subjects to streamline daily revision.
 - Used daily by an active student throughout the full exam preparation cycle.
